

NFS 394Y/494Y – RESEARCH PROJECTS IN NUTRITIONAL SCIENCES GUIDELINES 2012-2013

This course is offered to the third/fourth year students who have a strong academic background with at least a B+ in the 2nd/3rd year and an interest in research. It provides an exciting, challenging, and educationally rewarding experience to qualified students. In essence, the student, with guidance from a staff member, plans, carries out, and writes a final report on an approved, limited research project. In this way, the individual student is provided with experience in all of the important aspects of research. The course gives the student a chance to experience the challenges, rewards and frustrations of life in research.

Students interested in the research course are encouraged to become familiar with the research activities and interests of core academic and cross-appointed staff members. This information is summarized in the publication “Profile of Staff Research Interests”, available in the Department Office (Room 316). It is recommended that the student contact those individuals working in the areas of interest to discuss the staff member’s availability for NFS 394Y/494Y supervision and possible research topics. **Acceptance into the course requires:**

1. Prior consent of the supervising staff member.
2. Strong academic background (B+).
3. Courses taken in nutrition
4. Departmental approval.

Orientation Meeting:

All students meet with Course Coordinator 3-5 p.m. Friday, September 14 (tentative), Room 320.

Research Proposal

The student is required to present a written Research Proposal to the Course Coordinator **by Monday, October 22**. This should follow a format covering the seven items indicated under Protocol Format. Each student is also expected to make a 10-minute oral presentation on the proposed research on **Wednesday, November 7**. **All NFS 394Y/494Y students and their supervisors are expected to attend these presentations.** Students also must attend the Safety Seminar to be held in **October**.

Research Report

The student is required to prepare a final report on the work carried out, and submit it, initially to the Supervisor for comments and/or modification. Subsequently, the final typed version is to be submitted to the Course Coordinator. **The format of this report should follow that of a reputable scientific journal.** In addition, each undergraduate investigator will present a 10-minute oral presentation or poster presentation on the research to the NFS 394Y/494Y student-staff group **(date/time to be determined)**.

Deadlines

In order that grading in the course can be completed in time, the following deadlines for submission of the proposals and reports will be used:

Monday, October 22 --- Written Research Proposal to Course Coordinator
Wednesday, November 7 --- Oral Presentations of Research Proposals
Monday, March 11 --- Completed Research Report to Supervisor
Thursday, March 28 --- Final Research Report to Course Coordinator
April (date/time to be determined) --- Oral Presentations of Research Reports

All students are urged to submit their written materials to the Supervisor and Course Coordinator in advance of these deadlines.

Research Meetings

The Course Coordinator is available to assist students if difficulties arise or if general advice is required.

Important Notes

- (1) The last date for students to withdraw from the course without academic penalty is **February 20, 2013**.
- (2) Students should recognize that the outline for a proposal is closely similar to that of the final report to be presented at the end of the course. Thus, time spent in assembling and refining a good proposal will greatly simplify preparation of the final report.
- (3) Problematic situations often occur in research and individuals who encounter such difficulties should recognize that research is essentially a problem-solving experience. In the event that a student has difficulties and fails to meet initial objectives the student should discuss this situation with the course Coordinator. The final mark will be based on the approaches taken to overcome the problems. In all cases, the emphasis in marking will be an evaluation of the student's prowess in the scientific methodology rather than the production of publishable results.
- (4) All research work with humans or animals raises questions of an ethical and/or moral nature. The student is expected to address this topic in the proposal and show how questions of this type are to be resolved. Human and animal subject's approval forms are required and should be appendixes.

Guide for Research Proposal

There are numerous approaches that can be taken in drawing up a research proposal. For NFS 494Y, the proposal should be brief [four or five pages double-spaced, references can be on a separate page(s)], clearly indicating the interest area and its importance, identifying specific problems or questions to be addressed in the study, and presenting the work to be done and the approach to be taken. The following outline elaborates on this scheme.

Protocol Format

1. Importance of or Interest in Topic

The research area should be introduced **briefly** and its importance indicated.

2. Present Knowledge

The **highlights** (literature review) of what is presently known about the subject should be covered **concisely** and questions remaining or gaps in the knowledge should be noted.

3. Project Focus and Hypothesis

The specific question or problem to be the focus of the study should be **clearly** laid out and the contribution that it will make to knowledge, understanding, or practices in the area should be identified. State your hypothesis.

4. **Design**

A **brief** but detailed experimental plan or outline of the projected work should be presented along with a **reasoned** explanation for the approach(es) being taken. The project should be realistic in terms of what can be accomplished in this course, and should provide the student with experience in all areas of a research project, from development to completion.

5. **Experimental Work – Data Collection**

This part should summarize the actual procedures or analytical methodology to be used in obtaining results and include steps taken to ensure reliability, precision, and accuracy. It should include the source (i.e. human, animal, plant) of the samples to be analyzed, the number of the samples to be analyzed, and the time frame for sample acquisition and analysis.

6. **Data Analysis**

The methods to be used in processing the data and in ensuring their validity should be presented.

7. **Time Allocation**

A timetable indicating dates by which important goals are expected to be reached or experimental work completed should be included at the end of the proposal. This is a full course with an estimated time commitment of 180 or 200 hours, or an average of 8 hours/week during the term. Projects undertaken need to be realistic for this time. Discuss with your supervisor.

Marking Scheme

Part I: The Written Research Proposal and its Oral Defence will account for 20% of the final mark. The written will count for 10% of the final mark with equal weighting for the Supervisor and the Course Director. The oral will count for 10% with equal weighting from the Supervisor, Course Coordinator and other staff members.

The **Written Research Proposal** will be marked as follows:

- Literature Review: 25%
- Identification of problem/determination of hypothesis: 25%
- Design for testing hypothesis, including method of data collection, data analyses, potential problems: 50%

The **Oral Presentation of the Research Proposal** will be marked as follows:

- Literature Review: 20%
- Identification of problem/hypothesis: 20%
- Design for testing hypothesis, including method of data collection, data Analyses, potential problems: 20%
- Defence - answering questions: 20%

- Participation and asking questions 20%

Part II: The Final Evaluation is worth 60% of the final mark. Of this 40% will be based on the final written report as judged by the supervisor and Course Director. The oral presentation of the results, discussion and conclusions will determine the final 20% of the mark. All faculty members in attendance, or their approved delegate, will judge this component.

The written report should be in the format of a journal article appropriate to our area of research. It should be no longer than 15 pages double spaced, including text, data and references. The journal format/style being followed should be indicated in your title page. Marks will be deducted if the current journal style is not followed, including proper citations.

The **Written Report** will be marked as follows:

- Literature Review, Identification of problem/determination of hypothesis, design for testing hypothesis, including method of data collection, data analyses. 30%
- Presentation of results, discussion and conclusion 70%

The **Oral Presentation of the Research Project** will be marked as follows:

- Background 20%
- Presentation of results and conclusions 50%
- Defence -answering questions: 20%
- Participation and asking questions 10%

The supervisors assessment of your contribution to the research an demonstrated interest in and aptitude for research will be worth up to 20% of the final grade.

COURSE BALLOT – 2012-2013
NFS 394Y*/494Y* – RESEARCH PROJECTS IN NUTRITIONAL SCIENCES

***Circle selected course**

- Return this completed ballot to the Department of Nutritional Sciences, Room 316, FitzGerald Building, by **September 4, 2012**

- Acceptance into the course requires:
 - 1) Prior consent of the supervising staff member*
 - 2) Strong academic background (**B+**)
 - 3) Courses taken in nutrition
 - 4) Departmental approval

*Have potential supervisor sign below as indication of willingness to supervise.

Supervisor

Name Signature

Applicant:

NAME: _____

Surname First Name COLLEGE:

STUDENT NUMBER: _____ CURRENT PROGRAM (S): _____

HOME ADDRESS: _____

POSTAL CODE: _____ TEL: _____ EMAIL: _____

SESSIONAL ADDRESS: _____

POSTAL CODE: _____ TEL: _____

Please provide a copy of your current academic record (this does not need to be an official transcript – it can be a copy of your student copy). The average required is B+.

FOR DEPARTMENTAL USE ONLY
___ You have been admitted to NFS 394Y/494Y for the 2012-2013 Session.
___ You have not been admitted.
